

NRG
TRAINING

SAFETY IS MORE THAN A REQUIREMENT

FIELD EXPERIENCE TRAINING READY FOR ACTION

At NRG MED, we believe that safety is not just a requirement but a core value.

NRG MED Training was created from NRG MED's direct experience in the Oil & Gas sector, a highly complex environment where safety, expertise, and swift action are essential.

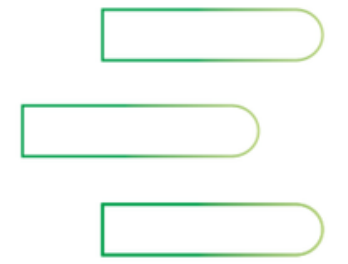

For years, we have supported companies with specialized operational solutions, gaining a practical understanding of processes, risks, and the real needs of those working in the field.

From this experience comes a training offering designed to be activated quickly and respond effectively to the operational needs of our Clients.

Our programs are built around company goals and developed according to the highest QHSE standards, thanks to certified trainers, advanced simulations, and multilingual courses.

We provide ready-to-deliver, flexible, and customizable solutions available in classroom, on-site, or remotely.

WHEN TRAINING TURNS INTO AN URGENCY

Training cannot be delayed.

In the Oil & Gas sector:

- **Deadlines are tight**
- **Operational downtime is costly**
- **Compliance is mandatory**

**NRG Training exists to
provide an instant response.**

- **Real field experience shared across all sectors**
- **Training doesn't happen behind a desk**
- **We work directly on the facilities**
- **We know the procedures and the risks**
- **We speak the language of the field**

**Those who train know what it means to work
there.**

TRAINING PERFORMANCE OVERVIEW

The following charts highlight the company's training performance in both external and internal activities over recent years.

They show a consistent increase in the number of people trained, the volume of sessions delivered, and the overall investment in employee development.

Together, these results reflect a structured, growing, and increasingly impactful training function, capable of supporting both clients and internal workforce development.
